## Update on Covid Surge

Good Morning,

On the one hand I am very pleased to say the story of an infected player was indeed "fake news" but on the other hand very unhappy that such a story could have started in the first place, my apologies to all who may have been affected by this story but I had to react on the information passed on.

We are currently in a HotSpot of covid infections and I urge all our members to take all possible precautions but please be very sure of your facts before passing on information about people who may be infected.

Also a reminder that it is a players responsibility to report to us if tested positive and when to ensure people who may have been in close contact are informed timeously.

Regards  
Greg Phillips
